PLZ DO A 1980 DODGE POWER RAM. The RAM DLC was installed, but did not appear in car show room and in the game, period, and as the patch 1.6.1. All I see is the 1.6.0 patch. Is there a glitch in this RAM DLC, as to why it shows that it is installed, but does not show up in the game at all?. By the way.. I am running the beta version 1.6.0. More great content

If you like Dodge Ram this is great DLC adds some new stuff to play with
