Nice chunk of stuff to support a Developer that's shown a great deal of heart in crafting this game.. A great way to support the devs and receive a ton of great stuff in return. The bonus XP and gold rates will help you unlock new cards and masters faster, the 500 shards are a nice boost, and the 2,500 rubies alone are valued at \$25. Highly recommended.. Listen here, people. The game is free. A lil' boost hurts nobody. Another plus is to support those great developers on a F2P game. I bought this 2 days after I started playing since I knew I'll be here for a while (100h ingame time and counting, mostly playing actively, rarely watching a stream). Love to support the devs this way and also getting a small bonus for myself.
